

HOW TO EXIT *Corporate Life*

YOUR STRATEGY FOR A SEAMLESS TRANSITION
TO BECOMING YOUR OWN BOSS.

VIRTUAL **MISS FRIDAY**

1: Consulting

Consulting helps pin down the key fundamentals of how your new business venture will come together, and provides an overview of the way forward and timeframe to make it happen (aim for approx 3-6 months).

2: Presence

Branding & website development give you a platform from which you will offer your services or deliver your products. It's the gateway to potential clients and customers.

3: Systems

Create your high end offer, and systematically showcase this to your advantage, for a professional and 'wow factor' presentation that will set you apart!

4: Dossier

A InSourcing Dossier is quite a unique, and certainly a high converting approach for confidently securing clients for your new online business.

5: Operations

As you may not be familiar with the new systems and processes in your online business, itemising operating procedures inside your own "intranet" would give you a complete operations manual of instructions for moving forward.

6: Launch

A solid strategy to begin outreach to potential clients, plus a marketing plan for the business will kick-start your business online to allow you to make that final exit from the corporate life.
